

# 16TH CIRP Conference on Computer Aided Tolerancing

**CHARLOTTE, NC USA      JUNE 15-17, 2020**

***Opportunities and Constraints in the  
Standardization of Geometrical Product Specifications***

A key focus of the CIRP CAT 2020 will be the role of standardization in GPS specification, and the constraints and opportunities provided by standards throughout the design lifecycle, including in the verification of products.

Papers are solicited that address research in these areas, and the extensive discussion of issues is anticipated between researchers and practitioners from both academia, industry, and national laboratories.

I look forward to welcoming you to Charlotte in the summer of 2020

*Edward Morse*  
*Professor and Conference Chair*

***Keynote Presentations:*** *We are pleased to have two leaders in the standardization of tolerances giving keynote presentations at the conference*

**Iain Macleod**

Chair: ISO/TC213

**Paul Drake**

Chair: ASME Y14.5
